## **Meteorology and Atmospheric Physics**

*Managing Editor:  
R. Steinacker, Wien*

SpringerWienNewYork

**Meteorology and Atmospheric Physics** will accept original research papers for publication following the recommendations of a review panel. The emphasis lies with the following topic areas:

- atmospheric dynamics and general circulation
- synoptic meteorology
- weather systems in specific regions, such as the tropics, the polar cap, the oceans
- atmospheric energetics
- numerical modeling and forecasting
- physical and chemical processes in the atmosphere, including radiation, optical effects, electricity, and atmospheric turbulence and transport processes
- mathematical and statistical techniques applied to meteorological data sets
